

'e Scan™

eScan Anti-Virus Security for Mac

eScan Anti-Virus Security for Mac is a security solution designed exclusively for Apple Macintosh machines running Mac OS X. It provides comprehensive and advanced proactive protection to computers based on the Mac platform against Viruses, Spyware, Adware, Rootkits, Botnets, Keyloggers, and other security threats.

Key Features

User-friendly GUI

eScan Anti-Virus Security for Mac has a user-friendly graphical interface that is suitable for both novice and expert users, specifically designed to suit the emerging technology trends.

On-demand Scanning

eScan Anti-Virus Security for Mac facilitates faster scan of your system when being very light on system resources. This ensures that your computer does not slow down, even when eScan is performing an on-demand scan of files/directories.

Scheduled Scanning

eScan Anti-Virus Security for Mac facilitates scheduled scanning thus providing you the best protection against security threats. It performs scheduled scans in the background for selected files/directories or the entire system.

Effective Real-time Protection

eScan Anti-Virus Security for Mac monitors and provides protection on real-time basis against viruses and other security threats with its advanced and innovative technologies. It keeps your Mac-based PC safe from infections and prevents malware from spreading. It provides protection to files/folders from malware and other security threats in real time, whenever they are accessed or executed. eScan Anti-Virus Security for Mac also scans the files that are downloaded via the Internet/ transferred via the network to your Mac system.

Powerful Heuristic Scanning for Proactive Protection

eScan Anti-Virus Security for Mac is powered by highly sophisticated

Heuristic Algorithms, which detects unknown viruses that are continuously being released by malware writers. eScan actively scans for malware as and when files/folder are accessed and prevents malware from executing. It detects and warns users about applications that run suspiciously, thus providing protection from Zero-Day threats.

Effective Endpoint Security

eScan Anti-Virus Security for Mac edition enables blocking of USB based Storage devices, thus preventing data theft and transmission of Viruses, Trojans or any other malware.

Automatic and Manual Virus Updates

eScan Anti-Virus Security for Mac checks for the latest virus definition updates at regular intervals, thus protecting your system from the latest malware attacks. It allows download of updates either via a proxy server or by using a direct Internet connection, which is configurable as per the user's requirement.
